PROFILE

Fifth-year engineering student (IATD-SI, ENSAM Meknès) seeking a final-year internship in data science / applied AI. Data science internship at Technocolabs (2025); projects in predictive models on supply-chain and sensor data, recommender systems, and LLM applications.

Fast, continuous learner: picked up Julia, Rust, Unity / AR, RL and MLOps through my projects — I never stop learning.

SKILLS

Data science: Python, pandas, NumPy, scikit-learn, LightGBM, SQL (PostgreSQL), feature engineering, cross-validation
Models: decision trees, SVM, Isolation Forest, recommender systems (SVD, NCF)
LLM: API integration (Groq, OpenRouter), structured outputs
Reporting: Streamlit, Next.js, Recharts, FastAPI

EXPERIENCE

Full-Stack Developer Intern — DigiScia, Ouagadougou (Burkina Faso) Jul – Sep 2026

- SimpleOQuotidien project (connecting small-trade service providers with clients: search, quotes, assignment); my part: the front-end, in Next.js.

Data Scientist Intern (remote) — Technocolabs Softwares, Indore (India) Aug – Oct 2025

- Team project "Startup Acquisition Analysis & ML Pipeline": predicting startup outcomes (acquisition, closure, IPO, continued operation).
- My part: decision trees and SVM on the "companies" dataset.
- Contributed to preprocessing, feature engineering and cross-validation (per the certificate).

PROJECTS

Avilyre — supplier risk management SaaS Python, LightGBM, FastAPI, Next.js, Supabase

Academic capstone project, solo · avilyre.com

- Supplier delay and defect prediction models (LightGBM) built from delivery history; temporal evaluation on synthetic data.
- CSV/XLSX import with AI-assisted column mapping; risk dashboards (5-dimension scores, alerts, exposure).
- LLM copilot (Groq / OpenRouter API) producing table-based analyses from the account's data.

AVIEN — industrial predictive maintenance FastAPI, Celery, Redis, TimescaleDB, Next.js, Docker Compose

Academic project, June 2026 · supervisor Prof. Smail Zaki

- Sensor data pipeline (TimescaleDB, Celery): anomaly detection (Isolation Forest), weighted health score, RUL with 95% confidence interval.
- Next.js dashboards, alerts and work orders; simulated data, no quantitative evaluation (per report).

Movie recommender system (MovieLens-1M) Python, scikit-learn, FastAPI, Streamlit

Group project (4 students), personal implementation

- Recommendation models (SVD, SVD++, NCF, hybrid) on MovieLens-1M (1M ratings, 6,040 users), exploratory analysis and dataset statistics.
- Evaluation module (RMSE, MAE, Precision@K, NDCG@K), FastAPI API and Streamlit interface.

OrlVoice — voice assistant to control a computer Python, PyTorch, CamemBERT

Team project (OrlCheetah repository)

- Speech recognition → NLP → action execution pipeline; fine-tuned CamemBERT intent classifier (click, typing, opening an application).

AI-generated document detector NLP

Fifth-year project, ongoing · Prof. Hosni, Prof. Fihri

- Detection of reports (final-year theses, etc.) written or not by AI; first stage: surveying suitable models and architectures.

EDUCATION

Engineering degree — ENSAM Meknès, IATD-SI track 2022 – 2027 (degree expected 2027)

LANGUAGES

French: working language, fluent · English: fluent written, intermediate spoken
