PROFILE

5th-year engineering student (IATD-SI, ENSAM Meknes) seeking a final-year internship in agentic AI and LLM platforms. Built an LLM copilot with structured actions (schema validation), a voice assistant mapping intents to actions, and multi-service pipelines (orchestration, APIs, evaluation). Previous internships in data science (2025) and full-stack development (2026). Strong technical curiosity, continuous learning mindset, and interest in clear communication with non-specialists.

SKILLS

LLM & Agents: API integration (Groq, OpenRouter), prompt engineering, structured outputs / tool calling, context management, RAG principles
Development: Python (structure, typing, tests), FastAPI, Docker / Compose, Git (branches, code reviews), SQL (PostgreSQL)
Evaluation: metrics (Precision@K, NDCG, RMSE…), out-of-sample validation, unit tests (pytest), regression tracking
ML / NLP: scikit-learn, LightGBM, Isolation Forest, CamemBERT (fine-tuning), pandas, NumPy
Other: TypeScript / Next.js, Celery, Redis, Streamlit; technical English (reading & writing)

EXPERIENCE

Full-stack Developer Intern — DigiScia, Ouagadougou · Jul – Sep 2026
- SimpleOQuotidien project (matching local service providers with clients); my part: Next.js front-end.

Data Scientist Intern (remote) — Technocolabs Softwares, Indore · Aug – Oct 2025
- Team project “Startup Acquisition Analysis & ML Pipeline”: predict startup outcomes (acquisition, closure, IPO…).
- My part: decision trees and SVM; preprocessing, feature engineering, cross-validation (per attestation).

PROJECTS

Avilyre — Supplier risk management SaaS · Python, LightGBM, FastAPI, Next.js · avilyre.com
- LLM copilot (Groq / OpenRouter): analyses + actions validated by schema and confirmed by the user (tool calling).
- Delivery-delay / defect prediction (LightGBM); reproducible pipeline, temporal evaluation; FastAPI + Docker + tests.

OrlVoice — Action-oriented voice assistant · Python, PyTorch, CamemBERT (OrlCheetah repo)
- STT → NLP → action execution pipeline (open app, click, type). Fine-tuned CamemBERT intent classifier.
- Agent-oriented design: intents mapped to tools / actions.

AVIEN — Predictive maintenance · FastAPI, Celery, Redis, TimescaleDB, Docker Compose · Jun 2026
- 5-service orchestrated architecture (API, workers, DB, UI). Anomaly detection, RUL, occlusion-based explainability.
- Documented limitations: simulated data, no quantitative evaluation.

MovieLens-1M recommender + evaluation module · Python, FastAPI, Streamlit
- SVD / NCF / hybrid models; evaluation module (RMSE, MAE, Precision@K, NDCG@K); API + interface.

EDUCATION & LANGUAGES

State Engineering Degree — ENSAM Meknes, IATD-SI track · 2022 – 2027

French: fluent (working language) · English: proficient in writing, intermediate in speaking
